To Whom It May Concern,

Recommendation Letter: Simon Flenman

I am pleased to write this letter of recommendation for Simon Flenman, who was enrolled in my Information Security course at Malmö University, Sweden and later completed his bachelor's thesis under my supervision.

During the course, Simon demonstrated a strong grasp of key security principles and consistent engagement with the subject matter. His performance in both theoretical and practical aspects of the course was impressive, and he consistently displayed a keen interest in exploring contemporary challenges in cybersecurity.

For his bachelor's thesis, titled "Machine Learning for Intrusion Detection in Network Traffic", Simon applied machine learning techniques to address a highly relevant problem of detecting network intrusion. He approached the project with a high level of dedication. Throughout the thesis process, he showed strong independence, a collaborative attitude, and an ability to integrate complex concepts in machine learning and network security. His final thesis was of excellent quality and reflected his commitment to excel in his career.

Based on his academic performance and research capabilities, I am confident that Simon has the skills, determination, and mindset to succeed in future academic or professional endeavors.

Simon's proficiency in English and Swedish languages, across reading, writing, listening, and speaking, is excellent. I am confident that he will thrive and make meaningful contributions to the position he has applied for.

I highly recommend him for any opportunity he chooses to pursue. Please feel free to contact me should you require any further information.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Kayode Sakariyah Adewole'.
